## Decorative Solutions

Explore the difference - Decorative Solutions is our source of inspiration. It lifts the possibilities of plastic packaging to another level and enables you to explore our products with all senses on many different surfaces.

The revival of our everyday life is stepping back into the foreground. We look ahead with a new zest for action, and meet unforeseeable challenges flexibly and imaginatively. Together we use the rapidly developing digital possibilities to intelligently optimize our ways of life. Imaginative and curious, we explore what is new and colourful before us. The recyclable material plastic not only plays a major role as a component of modern product design, but above all as a recyclable, sustainable and intelligent resource in the interests of our environment. The colors of this trend series are animated by good memories and equipped with fresh optimism and serve as shining companions in a carefree season.
