To facilitate further growth, Gabriel-Chemie has broken ground on the expansion of its warehouse capacity at the headquarters in Gumpoldskirchen, Austria. The plan is to enlarge the existing warehouse by approximately 3,200 m<sup>2</sup>. This measure is in line with the company commitment to environmental protection and sustainability, as all existing green areas will be preserved. This expansion will be accompanied by a new traffic concept equipped with state-of-the-art technical filters to avoid contamination.

Inside the new building, a flexible rack system will be installed, providing an additional 5,000 pallet spaces. This will make open air storage spaces obsolete

in future. As a result, the Gumpoldskirchen site will further strengthen its significant role for the Gabriel-Chemie Group, especially in the field of supply chain and logistics. Additionally, the building will be equipped with a photovoltaic system contributing an additional 320 kWp to the existing 881 kWp installation.

Gabriel-Chemie CFOO Andreas Berger commented "This warehouse extension, requiring an investment of €7.0 million, underscores our commitment to further strengthen Gabriel-Chemie's position as a future-oriented masterbatch manufacturer."

*GABRIEL-CHEMIE specialises in refining and colouring plastics. The company was founded in 1950 and is now one of Europe's leading masterbatch manufacturers. The independent, privately owned group is operating globally and has its headquarters in Gumpoldskirchen in Austria, and operates further subsidiaries in Germany, Great Britain, Hungary, the Czech Republic, Poland, Italy, Spain and Russia, where it employs approximately 630 people.*
