Autumn is a season that enchants us with a breathtaking palette of colors. Nature dresses in warm, vibrant tones, transforming landscapes into a living painting. The leaves turn magnificent shades of red, orange, and yellow, the air becomes cooler and crisper, and nature prepares for the tranquility of winter.

Amidst this picturesque scene, the warm tones of autumn have a calming and balancing effect. They help us find peace and leave behind the hustle and bustle of everyday life. The intense colors stimulate creativity and inspiration, inviting us to consciously experience the beauty of nature.

These many color impressions harmonize and blend seamlessly, which we can consciously capture and beautifully represent in plastic thanks to our marble technology. Shades of red, the color of passion, represent warmth and energy, bringing vibrancy to the autumn landscape. Gold and yellow tones, the colors of light, evoke the warm sunlight that shines through the ever-shortening days, bringing optimism and joy. Brown tones, the color of the earth, bring tranquility and serenity to the autumn color palette, reminding us of our connection to nature.

All locations of the GC Group participated in the „Autumn SPA“ edition, analyzing trend colors from all over Europe and contributing creatively. By analyzing new color trends from various industries and considering social influences in the market, new trend themes are developed every year. Each theme is visualized through nine innovative color samples.

The creative collaboration of all branches on the new „Autumn SPA“ edition and the joint development of Colour Vision 27 once again delights Gabriel-Chemie.

GABRIEL-CHEMIE specialises in refining and colouring plastics. The company was founded in 1950 and is now one of Europe's leading masterbatch manufacturers. The independent, privately owned group is operating globally and has its headquarters in Gumpoldskirchen in Austria, and operates further subsidiaries in Germany, Great Britain, Hungary, the Czech Republic, Poland, Italy, Spain and Russia, where it employs approximately 600 people.
