

Gabriel-Chemie introduces MAXILOOP Compatibilizer series for recycling applications!

Gabriel-Chemie, as a leading manufacturer of masterbatch, is once again defining the standards in the plastics industry. After intensive research and development work, we are pleased to present our new, versatile series of innovative compatibilizers. These additives have been specifically developed for applications with recycled polymers and support the sustainable use of recycled materials across all industries.

Expanding our MAXILOOP portfolio by a series of ten new compatibilizers especially suitable for overcoming the challenges of using and processing recycled polymers. We are aware that every field of application has different requirements. Our engineers have therefore created a series that is suitable in a wide range of applications and tailored to the specific requirements of our customer's products.

The industry is facing various challenges in sustainability and environmental friendliness. Our compatibilizers elevate the quality of recycled polymers to a new level. By carefully selecting a combination of suitable additives, we promote the production of high-quality end products. MAXILOOP compatibilizers not only offer outstanding compatibility between different polymers to counteract

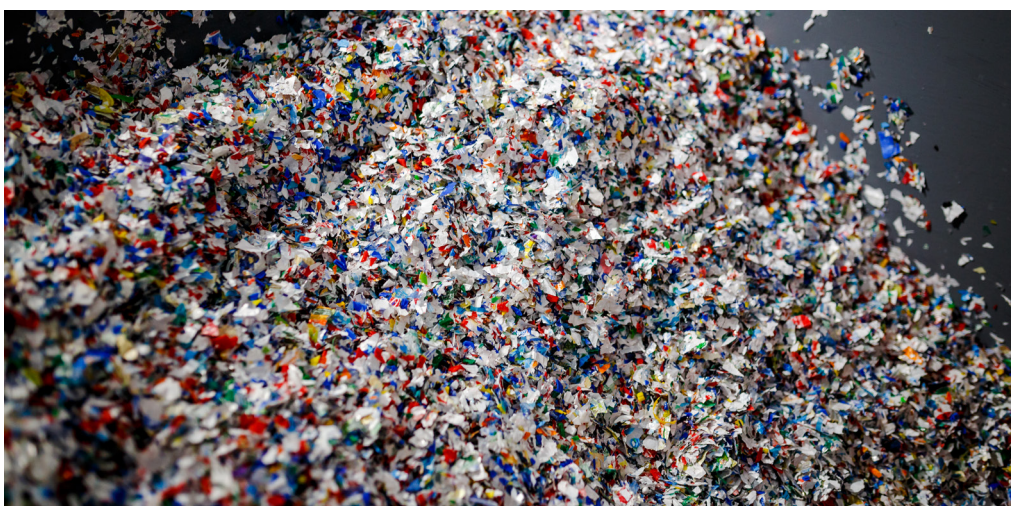

processing problems, they also optimize the mechanical properties matching the end product's requirements. Resulting in an increase in performance, improvement of the recyclability of post-consumer and post-industrial recycled polymers and new possibilities the MAXILOOP compatibilizers support various applications.

Our technicians help you in the selection of the optimal compatibilizer for your application. Through personalized advice and support, we ensure that your specific requirements are met in the best possible way and support you with our innovative solutions.

Gabriel-Chemie is proud to make a significant contribution to the circular economy and sustainability. Our MAXILOOP Compatibilizers are not only a technological advancement, but also a commitment to an environmentally friendly future.

Contact us to find out more about our MAXILOOP Compatibilizer series and possibilities in your industry. Gabriel-Chemie stands for quality, innovation and sustainability - together we are shaping the future! Follow our regular posts in which we present application areas for our compatibilizers!
