Introducing the new website of Gabriel-Chemie.com

A Contemporary Digital Experience Redefining Innovation and Collaboration Gabriel-Chemie, a European leader in masterbatch, color and additive solutions for plastics, is thrilled to unveil its newly redesigned website, Gabriel-Chemie.com. With a fresh and modern interface, the website represents a significant step forward in enhancing user experience, providing valuable resources, and fostering a stronger connection with customers and partners.

The new site offers visitors an immersive journey into the world of our innovative color and additive solutions. The redesigned website showcases the company's commitment to technological advancement, sustainable practices, and creative collaboration. From intuitive navigation to insightful content, users will find a seamless browsing experience that reflects Gabriel-Chemie's expertise and dedication to excellence.

Sustainability Commitment: Gabriel-Chemie's dedication to sustainability is featured on the page, outlining the company's eco-friendly initiatives and products designed to minimize environmental impact.

Global Reach: The website offers localized content and support for multiple languages, ensuring a global audience can engage with the company's offerings effortlessly.

With its user-centric design and rich content, the new Gabriel-Chemie.com embodies the company's forward-looking vision and commitment to excellence. It serves as a testament to Gabriel-Chemie's role as a market leader and an invaluable partner in shaping the future of the plastics industry.

For more information, please visit the new website at www.gabriel-chemie.com.

GABRIEL-CHEMIE specialises in refining and colouring plastics. The company was founded in 1950 and is now one of Europe's leading masterbatch manufacturers. The independent, privately owned group is operating globally and has its headquarters in Gumpoldskirchen in Austria, and operates further subsidiaries in Germany, Great Britain, Hungary, the Czech Republic, Poland, Italy, Spain and Russia, where it employs approximately 630 people.
