Gabriel-Chemie passes the ISO 13485 surveillance audit at its German and Austrian sites

Gabriel-Chemie Group, leading producer of masterbatch and compounds for the medical industry, effectively re-confirmed their Austrian and German sites according to ISO 13485:2016, the medical quality management system.

Mr. Thomas Wölfer, Corporate Quality Manager, explains "we first certified to ISO 13485 close to 15 years ago; now we have passed this year's surveillance audit without any deviations at both of our specialized sites, being able to offer supply continuity to the medical and pharma industry through 2 specialized sites. We avoid all kinds of risks through strongly specified and controlled processes"

Mr. Diego Karpeles, Corporate Business Development and Innovation Manager, explains that "Gabriel-Chemie started their activities in 1950 and their masterbatch production 55 years ago. We are European pioneers in masterbatch and compound production and we have been supplying the medical industry since day one. The extension of our certifications is the logical consequence of our commitment to quality and continuity in the medical plastics industry.

ISO 13485 was first published in 1996, the current edition dates 2016 and is generally harmonized with ISO 9001. Our certificates are visible at <https://gabriel-chemie.com/en/our-certificates>.

GABRIEL-CHEMIE specialises in refining and colouring plastics. The company was founded in 1950 and is now one of Europe's leading masterbatch manufacturers. The independent, privately owned group is operating globally and has its headquarters in Gumpoldskirchen in Austria, and operates further subsidiaries in Germany, Great Britain, Hungary, the Czech Republic, Poland, Italy, Spain and Russia, where it employs approximately 600 people.
