Gabriel-Chemie launches a **new range of halogen-free masterbatches for use in polyamides**. The range includes products for applications such as **stadium seats** and **electrical installation components**.

HALOGEN-FREE FLAME RETARDANT

masterbatch

@Gabriel-Chemie

Flame retardant polyamides are special polymers with fire-inhibiting properties. These chemicals are added to products such as computers, electrical and automotive parts and insulation materials.

The implementation of stringent fire regulations, concerning the safety of the consumer is driving the adoption of these polymers. Our balanced portfolio of material solutions will give you the opportunity to find the optimal solution for your materials. We offer proven materials along with the expertise and experience of our experts to understand your needs.

GABRIEL-CHEMIE specialises in refining and colouring plastics. The company was founded in 1950 and is now one of Europe's leading masterbatch manufacturers. The independent, privately-owned group has its headquarter in Gumpoldskirchen in Austria, and operates further subsidiaries in Germany, Great Britain, Hungary, the Czech Republic, Poland, Italy, Spain, and Russia, where it employs approximately 600 people.
